DETAILED ACTION

Election/Restrictions

1. Claims 21-26 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim.

Election was made without traverse in the reply filed on 8/25/2006.

Claim Rejections - 35 USC § 112

- 2. The following is a quotation of the first paragraph of 35 U.S.C. 112:
 - The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.
- 3. Claims 8 and 9 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.
- a) Claim 8: "inert gas" was not in the specification as originally filed.
- b) Claim 9: "about 1 to about 4 microns" was not in the specification as originally filed.

Art Unit: 1762

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

- 5. Claims 1-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
- a) Claim 1, last line: there is no antecedent basis for "the at least one prosthetic device".
- b) Claims 7 and 17 are virtually identical.

Claim Rejections - 35 USC § 103

- 6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 7. Claims 1-2, 4-8, 11-13 and 17-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Melitis (5334264).
- '264 teaches plasma nitriding Ti or Ti-6Al-4V, such as used in implants, using N2 and Ar in the apparatus of Figure 1 (which is similar or the same as used by applicant) (see Abstract,

Art Unit: 1762

Figure 1). The pressure of the chamber is 5X10-6 to 1.5X10-5 Torr prior to introduction of the nitrogen-argon and 5-250 milliTorr after introduction (4:12-41), which overlaps with applicant's claimed ranges. A bias voltage of 200 V-5 KeV is applied to the specimen as DC current (4:42-47). A tungsten filament is used to generate electrons (4:48-58). The temperature is 300-600 degrees C (4:59-68). The thickness of the nitrided layer is 20-90 microns.

8. Claims 1-6 and 9-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bordji et al (Biomaterials, 17, pp 929-940, 1996).

Bordji teaches nitriding Ti, Ti-6Al-4V or a cobalt containing alloy, all of which can be used in implants, using a plasma process in a vacuum chamber at 800 degrees C and a voltage of 600 volts. The thickness of the nitrided layer is under 4 microns (see pages 929-932, Abstract, Table 1). These values overlap with those claimed by applicant.

Conclusion

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Erma Cameron whose telephone number is 571-272-1416. The examiner can normally be reached on 8:30-6:00, alternate Fridays off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Timothy Meeks can be reached on 571-272-1423. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
